

6 CALLER DISPLAY (NETWORK DEPENDENT)

The feature is available if you have subscribed to the Calling Line Identification service with your network service provider. Your phone can store up to 10 received calls with callerline information in the Call List. The number will be shown on the handset display when the phone is ringing. If the number matches with one of the entries in your Phonebook, the caller's name stored in the personal phonebook will be displayed automatically with the number, and the handset will ring with the ringtone associated with that phonebook entry.

If the call is from someone who withheld their number, e.g. by dialling 141, **WITHHELD** will display.

If the call is from someone whose number is unavailable, e.g. an international call or from a private exchange, **"OUT OF AREA"** will display.

If you've got new Caller Display records, the handset will display "X NEW CALLS" in standby mode. The New Calls indication will remain until all the new call records have been viewed.

1. View the Call List
All received calls are stored in the Call List with the latest call at the top of the list. When the call list is full, the oldest call will be replaced by a new call. Any unanswered calls which have not been viewed are marked with a "<" sign at the centre of the bottom line of the list.

1. Press <C> to access the call list.
2. Press <C> to select the desired entry.
3. Press <C> to view the caller's number and details, and then <C> to OK the display and time of the call. Press <C> to go back to the previous screen.
